2023

Green Today. Greener Tomorrow.

Welcome to our 2023 Southern Trident Product Catalogue

Remaining true to our environmental responsibilities - Green Today, Greener Tomorrow

Welcome to the Southern Trident Product Catalogue 2023. What a year 2022 was for the company, and we predict an even better year in 2023.

Hot off the press is our newly revamped southerntrident.com website. The sales agents page will help you look up the representative for your area. The handy store locator pinpoints the hundreds of retail locations stocking our brands' products. Log in to the website to download retail ready product and media assets and you can even access current inventory levels.

Our success this year has been partly fuelled by remaining true to our environmental responsibilities and only producing environmentally-friendly, 100% peat-free growing media and the overwhelming success of the launch of the market's first ever carbon neutral range of compost Harmony Gardens, has meant we continue to grow exponentially – both in sales and staff members.

In order to continue our outstanding support for all our retail partners, we've had to take on new members of staff in customer services, operations, warehousing and marketing, as well as instigating a new role of Sustainability Supply Chain Manager. To support our local neighbourhood, we also took on two local young men, who were initially part of the UK Government's Kickstart Scheme.

When you browse through the catalogue, you'll see we have increased our product range further.

The success of Harmony Gardens has inspired us to double the range. As well as the existing four products, new for 2023 are Fruit & Vegetable Compost, Farmyard Manure, Chipped Bark and Ericaceous Compost. The latter is every peat-free compost producer's trickiest type of compost to formulate, but we've done it and it grows acid-loving plants beautifully.

Coconuts and coir, the foundations of our products, are such versatile and accommodating materials with a wide range of uses and applications and form the basis for some rather special new products for 2023. Coco Burn is a BBQ charcoal made from recycled coconut shells. Growing your own microgreens at home has never been more popular and we have launched three complete Microgreen Kits.

With all this talk of new products, don't forget our existing ranges of Coco & Coir compressed composts, coir growing accessories and wide range of coir doormats.

Thank you for your support throughout 2022, which is much appreciated. We look forward to supplying you, and all of us having another brilliantly successful year, in 2023.

Kind regards

Steve Harper
CHIEF EXECUTIVE

CARBON NEUTRAL

Over the past few months, we at Southern Trident have measured our carbon footprint and continue to look at how we can reduce this further. Following on from this, we have become carbon neutral and are offsetting any remaining carbon via an accredited carbon offsetting project and achieving PAS 2060 accreditation.

RESPONSIBLE SOURCING SCHEME FOR GROWING MEDIA

We are proud to become one of the inaugural members of this scheme, again demonstrating our desire to ensure our products are as environmentally responsible as possible. This means that we have measured seven key environmental impacts of our products so that we can ensure they are as low as possible.

SOIL ASSOCIATION

We have also been working hard on achieving organic status for our coir. All coir produced by Southern Trident has Soil Association Approved accreditation. This means that our coir can be used for organic growing of our customers plants, flowers and vegetables and for those manufacturers that use our coir in their growing media the ability to get the same organic status.

COCO BURN

COCONUT SHELL BBQ CHARCOAL

COCO BURN™

COCONUT SHELL BBQ CHARCOAL

- Made from recycled coconut shells, not virgin wood
- Fast ignition time
- Extra long burn time when compared to traditional charcoal
- Suitable for charcoal and hybrid BBQ's
